**Beispiel**

How do you find your blood pressure actually?  
Tensoval® will show you.

# Always the suitable device for your customer.

Regular and reliable controls of the blood pressure are important in case of risk factors, such as cardiovascular diseases. Tensoval devices ensure safety on account of their simple application while providing high measuring accuracy at the same time.

The benefit – irrespective of whether you are at home or out and about, young or old, one or two users: Tensoval offers the ideal solution for everyone and contributes to an optimised monitoring of the course in the accustomed surroundings.

## Quality comes in threes.

- Ideal product family for your blood pressure assortment
- Safety ensured by high measuring accuracy confirmed by independent studies
- Reliable measurement when you are at home or out and about
- Minimisation of user errors on account of easy and fully automatic operation
- A quality product from HARTMANN with 3 years of warranty

## The classic.

The fully-automatic upper arm monitor using the oscillometric technology has a memory capacity for 2 x 30 measured values and averages including date and time. Suitable for two users.

For a correct measuring result, the easy-care nylon cuffs are available in two sizes: Spare cuff with 22 to 32 cm and extra large cuff 32 to 42 cm.

## Tensoval® comfort

- Extra large and clearly arranged design
- Storage pocket made of soft neoprene
- 1,500 measurements guaranteed

# For active people.

The wrist monitor using the oscillometric method is fully automatic and has a memory capacity for 2 x 60 measured values and averages including date and time. Suitable for two users, including guest mode (value is not saved).

## Tensoval® mobil

- Reliable measurement when you are at home or out and about
- Individual inflation pressure
- Practical hard case
- 2,000 measurements guaranteed

### COMFORT AIR TECHNOLOGY

This innovation permits an individual inflation pressure and thus makes the measurement more comfortable.

# Double safety for all users.

The upper arm monitor with Duo Sensor Technology combines fully automatically the benefits of the oscillometric technology with the Korotkoff's method, and stands for especially high measuring accuracy.

Combining two measuring methods, the device is especially suitable for several types of heart rhythm disorders or faint pulse sounds as well. Available also with spare and/or XL cuff.

## Tensoval® duo control

- Innovative technology of the latest generation
- Especially high measuring accuracy ensured by Duo Sensor Technology
- Storage pocket made of soft neoprene
- 1,300 measurements guaranteed
